JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY

Vol. 310 Nos. 1 and 2 25 July 1991

CONTENTS

Nernst equation complicated by electric random percolation at conducting polymer-coated electrodes
K. Aoki (Fukui, Japan) 1

Double layer effects in the electrode kinetics of amalgam formation reactions. Part II. A comparison of the CE and IE mechanisms
W.R. Fawcett (Davis, CA, USA) 13

A model for the adsorption of a commensurate layer of metal ions on a single crystal substrate
W. Lehnert (Düsseldorf, Germany) and W. Schmickler (Logan, UT, USA) 27

On solute–mercury interactions in dilute amalgams of main group metals
A.S. Baranski (Saskatoon, Canada) 39

An enzyme amperometric sensor for toxicant determination
H.C. Budnikov, E.P. Medyantseva and S.S. Babkina (Kazan, USSR) 49

Spectroelectrochemical properties of poly(4,4′-dialkyl-2,2′-bithiophenes) and poly(3-alkylthiophenes). A comparative study
M. Łapkowski (Gliwice, Poland), M. Zagórska, I. Kulszewicz-Bajer (Warsaw, Poland), K. Kozieł (Gliwice, Poland) and A. Proń (Krakow, Poland) 57

Controlled permeability of functionalized polypyrrole films by use of different electrolyte anion sizes in the electropolymerization step
S. Cosnier, A. Deronzier and J.-F. Roland (Grenoble, France) 71

Synthesis and polymerization of *o*-hexylaniline. Characterization of the corresponding polyaniline
E.M. Geniès and P. Noël (Grenoble, France) 89

Photoelectrochemical properties of polyaniline films
M. Kalaji, L. Nyholm, L.M. Peter and A.J. Rudge (Southampton, UK) 113

Effects of wavelength, pulse duration and power density on laser activation of glassy carbon electrodes
R.J. Rice and R.L. McCreery (Columbus, OH, USA) 127

The formation of an effective anti-corrosion film on copper surfaces from 2-mercaptobenzimidazole solution
G. Xue, X.-Y. Huang, J. Dong and J. Zhang (Nanjing, China) 139

Enzyme monolayer- and bilayer-modified electrodes with diaphorase and dehydrogenases
T. Tatsuma and T. Watanabe (Tokyo, Japan) 149

Comparative investigation of formic acid and formaldehyde electro-oxidation on palladium in acidic medium. Effect of surface oxides
M.I. Manzanares, A.G. Pavese and V.M. Solis (Cordoba, Argentina) 159

Electrochemical properties of difenzoquat herbicide (1,2-dimethyl-3,5-diphenyl-pyrazolium)
L. Pospíšil (Prague, Czechoslovakia), M.P. Colombini, R. Fuoco (Pisa, Italy) and V.V. Strelets (Chernogolovka, USSR) 169

Electrochemistry of inclusion complexes of organometallics. Complexation of ferrocene and azaferrocene by cyclodextrins
V.V. Strelets (Chernogolovka, USSR), I.A. Mamedjarova, N.M. Nefedova, N.I. Pysnograeva, V.I. Sokolov (Moscow, USSR), L. Pospíšil and and J. Hanzlik (Prague, Czechoslovakia) 179

Electrochemical and enzymatic oxidation of 5-hydroxytryptophol. Part II. Studies at physiological pH
F.-C. Cheng, M.Z. Wrona and G. Dryhurst (Norman, OK, USA) 187

Polythiophene electrogeneration on a rotating disk electrode. The influence of water on polymerization and polymer properties
T.F. Otero and J. Rodríguez (San Sebastian, Spain) 219

Electrochemical polymerization of poly(thiophene-3-acetic acid), poly(thiophene-co-thiophene-3-acetic acid) and determination of their molar mass
W.J. Albery, F. Li and A.R. Mount (London, UK) 239

Mechanistic studies of the electrochemical doping–undoping process of poly(1-naphthol) film using in situ multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS)
M.-C. Pham and J. Moslih (Paris, France) 255

Electrochemical behavior of polypyrrole/Kodak AQ composite polymeric films
J. Wang, Z. Sun and Z. Lu (Las Cruces, NM, USA) 269

(continued on p. 3 of cover)

Contents (*continued*)

Vector electron transfer from a flavin Langmuir–Blodgett monolayer to cytochrome *c*
S. Ueyama and S. Isoda (Hyogo, Japan) 281

The electrochemical reduction of perezone in the presence of benzoic acid in acetonitrile
F.J. Gonzalez, J.M. Aceves (Mexico City, Mexico), R. Miranda (Cuautitlán, Mexico) and I. Gonzalez (Mexico City, Mexico) 293

The effect of halide ions on the condensation of adenine at the mercury–water interface
V. Vetterl and R. de Levie (Washington, DC, USA) 305

Electrochemical evaluation of stearate-modified graphite paste electrodes: a selective detection of dopamine is maintained after exposure to brain tissue
C.D. Blaha and M.E. Jung (Vancouver, Canada) 317

The electrochemical desorption of n-alkanethiol monolayers from polycrystalline Au and Ag electrodes
C.A. Widrig, C. Chung and M.D. Porter (Ames, IA, USA) 335

Changes in the growth mode of electrodeposited silver layers. Surface rearrangements induced by the presence of lead adatoms
P. Carro, A. Hernández Creus, S. González, R.C. Salvarezza and A.J. Arvia (Tenerife, Spain) . 361

Study of the sorption phenomenon accompanying the break-in process of polymer film electrodes using a quartz crystal microbalance
J. Bácskai and G. Inzelt (Budapest, Hungary) 379

ALSV investigation of the phase composition of electrolytic Cu + Sn alloys
L. Skibina (Rostov on Don, USSR), J. Stevanović and A.R. Despić (Belgrade, Yugoslavia) ... 391

Voltammetric behaviour in perchloric acid of adsorbed residues formed at open circuit from the adsorption of acetaldehyde and ethanol on a Pt(111) electrode
F. Cases, J.L. Vázquez, J.M. Pérez and A. Aldaz (Alicante, Spain) 403

Short communications

Anodic growth of CdS thin films: an in situ Raman spectroelectrochemical study
D. Ham, Y. Son, K.K. Mishra and K. Rajeshwar (Arlington, TX, USA) 417

On the detection limit of the in-situ radiotracer adsorption technique. Comment on the paper by M. Gamboa-Aldeco and M. Szklarczyk
G. Horányi (Budapest, Hungary) 423

Reply to the comments by Horányi on "The detection limit of the in-situ radiotracer technique for the adsorption at the solid/solution interface"
M. Szklarczyk (Warsaw, Poland) 425

Preliminary notes

Preliminary study of the electrochemical adsorption behaviour of a palladium modified Pt(111) electrode in the whole range of coverage
J. Clavilier (Meudon, France), M.J. Llorca, J.M. Feliu and A. Aldaz (Alicante, Spain) 429

Alteration of the ion exchange mechanism of an electroactive polymer by manipulation of the active site. Probe beam deflection and quartz crystal microbalance study of poly(aniline) and poly(*N*-methylaniline)
C. Barbero, M.C. Miras, O. Haas and R. Kötz (Villigen, Switzerland) 437

Current oscillations during anodic dissolution of p-Si in ammonium fluoride: an investigation using ring disc voltammetry and ellipsometry
J. Stumper, R. Greef and L.M. Peter (Southampton, UK) 445
